MEASURING FOR THE WATSON BRA

This pattern has a very forgiving fit, since it does not use underwires and the cups stretch.

Use the following measurement guide and chart below to locate your size.

Band: measure around your ribcage just under your breasts. Use the guide below to find your band size.

Cup: Measure around both your full bust and your upper bust. Subtract the upper bust from your full bust and use the guide below to find your cup size.

TIP FOR MEASURING FULL BUST

Measure over the fullest part of your breasts without a bra and your back parallel to the floor. Hold the tape gently in such a way that you don't compress your tissue.
